VISMAY · A STUDIO FOR HUMAN-BUILT IP

Vismay.

A studio for human-built IP on a reclaimed internet.

SUPRO · 2026

The internet stopped being ours.

- Distribution is owned by a handful of feudal techlords.
- Every feed is algorithm-shaped, optimizing for something other than you.
- AI is eating the parts of work that were never the point.
- The opposite move — slow, human, named, obsessed with one thing — is suddenly available again.

The conditions for this kind of work haven't been this good in fifteen years.

“

Reclaim a piece of the internet by
building IP with people who actually care.

Pair a friend who has a real, durable obsession in a domain — with a shared engine that handles everything below the craft. Build the brand together, for the long run.

Partner brings taste — I bring the engine.

THE PARTNER

Voice, taste, obsession.

Editorial direction.

Owns the brand and the community.

VISMAY

Engine, ingest, render pipelines.

Production value of a major publication.

Time horizon and infrastructure.

They grow the IP. I grow with them.

That's what success looks like to me.

Same pipeline for every IP.

Internet · existing data + new / news

Ingest is the only thing that changes per IP.

Storage, engine, and surfaces are shared infrastructure — partners never touch code.

Two IPs running today.

LIVE

vizmaya.fyi

Footshort

Football

Web · Mobile · Native vertical bundle

STEWARD · SUPRO

Started with the two I could run alone — to harden the engine on real production load before bringing partners in.

The next wave is partner-led.

IN PRODUCTION

Kidzovo

Kids

OPEN PARTNER

Manufacturing — India

PADMA

@vismay/viz-engine

One runtime, three persistent layers.

THE STACK

TEXT CARDS

markdown · snap-locked

FOREGROUND VIZ

ECharts · transitions in-place

BACKGROUND VIZ

Mapbox GL · persistent context

Driven by IntersectionObserver. Persistent WebGL across the whole story.

WHAT IT CARRIES

- Module registry — map · chart · image · video · embed · rive
- Verticals as tree-shaken plugins
- Render pipelines — MP4 · PDF · TTS audio
- /admin authoring — no redeploy

17+ live stories. One engine.

Currency rankings 2026	Who owns America's debt	Projected population 2050
World Cup 2026 atlas	India fuel prices 2026	South Korea GPU-hour
European AI adoption	Prediction markets illusion	The Great Nicobar project
Press freedom 2026	GDP growth 2026	Largest armies 2026

+ five more on geopolitics, housing, delimitation, AI adoption, and economic divides

EPICS

/energy-profile

daily IEA news ingest + 33-country OWID energy data

/epstein

curated story set with a bespoke landing

Breadth is a feature, not a tradeoff.

01 Engine carries production value

every IP launches with publication-grade rendering

02 Partner carries authenticity

the voice is the human, not the platform

03 Pipeline keeps ingest honest

each domain has its own scrapers and tagging

04 I stay close enough to keep taste high

craft work at scale, not factory work

A small label with a shared studio — the opposite of a content farm.

What's next.

ENGINE

Extract data-bound football components into @vismay/footshort-viz. Decide on a native React Native engine when mobile editorial usage justifies it.

IPs

Bring the four in-production partners — Kidzovo, Protrip, F1, Enterprise & Finance — to first launch.

TOOLING

Admin polish, validation, type-narrowed YAML so partners self-serve more.

PEOPLE

Fill the open partner slots on the bench. Right person beats fast person.

Triggers are explicit — don't pull a roadmap item early just because there's capacity.

INVITATION

Who I'm looking for.

- FRIENDS WITH A REAL OBSESSION

in a domain on (or off) the list — pets, manufacturing, food, science, art, architecture, sport.

- BUILD AND GROW AN IP WITH ME

on shared ground — something we both care about. So by the time we're 50, even our meetings are monetizable.

- PEOPLE WHO WANT A PIECE OF THE INTERNET BACK

named, slow, human, built for the long run.
